
PyMIC

Release 0.1

HiLab

Aug 05, 2022

CONTENTS

PyMIC is a pytorch-based toolkit for medical image computing with annotation-efficient deep learning. PyMIC is developed to support learning with imperfect labels, including semi-supervised and weakly supervised learning, and learning with noisy annotations.

Check out the usage section for further information, including how to install the project.

Note: This project is under active development. The documentation has been moved to: <https://pymic.readthedocs.io/en/latest/index.html>
